

## Safety and Security:

1. Enforcement, enforcement, enforcement is key to any well-run community. There are many laws on the books that protect our community. Before we make new laws, let's enforce the ones we have. Regular and consistent enforcement sets a standard that residents and visitors, and businesses will appreciate.
2. Increase foot and bike police. We are a pedestrian city, and we need police at the pedestrian level. Too often, crimes occur where cars can not go. Police I envision on electric bikes would be able to cover larger areas without expending energy. The street crime, beach theft is out a hand. I would like to form a police task force to address all beach crime enforcement and prevention.
3. Super Speeders/Reckless Driving needs to be enforced. Too often, we hear the squealing of wheels and or a car going way too fast for the conditions. I have found the complaint is universal on the beach.

4. Our sidewalks, bike lanes, and crosswalks should be created, improved, or made safer. This gives the pedestrian/biker room for error and feels safe. Smart thought our infrastructure equals a safe and happy community.
5. Continue and increase police interaction with the community. Outreach programs that bring the police and community together in social gatherings of all types. The more we hang out, the stronger our community becomes.
6. There should be stiff fines/penalties for any violence/gun violence that accurse in our city. The whole city is completely tired of the never-ending story of street fights and shootings. We deserve better!
7. Add resources to Life Guard, Fire, and Police. They all request things they feed they need to keep us safe. Let's invest there!

8. We must eliminate the people living on our streets. It's not legal, and it's inhumane. We must get them plugged into programs/resources that can help them. Living on our streets should not be a solution we accept. I will make this one of my top priorities.
  
9. Property crime must be enforced and prevented. Beach theft, bike, and scooter theft should be some of our primary focuses.
  
10. Start a safety and crime committee/board.
