

Miami Beach Schools are an essential part of our community! Strong schools equal a strong community! Our schools should be well funded and supported by the city. If the school system can't or won't offer funds toward obvious needs, we should supplement. I truly believe schools add to our property values and are worth investing in. Our schools should be well maintained with freshly painted signs, good landscaping, and adequate learning materials. One thing I would like to push for is anti-bullying programs. When I was growing up, you had to fight back, or they would keep coming back. I never was taught this at home; I had to learn it at school. I never want to see kids have to learn to fight as part of life. We can stop this!

1. Continue and increase funding for schools where there is a need!
2. Make sure our schools are maintained to a world-class level in almost every category. They are a reflection of our community!
3. Support and sponsor anti-bullying programs. Our kids should not have to learn to fight!
- 4, Government interaction programs (programs for kids to get involved in local affairs/government)
5. Last and most important is the safety of our kids. I will be ultra-vigilant against any threat to our children from active shooters, gangs, or drug dealers. We will go after them all! Our children will not be targets!
